QUALITY, ENVIRONMENTAL AND INFORMATION SECURITY POLICY

The MANAGEMENT and the entire organization of AERODYNAMICS MÁLAGA S. L, a company specialized in NON-REGULATED TRAINING, undertakes to:

- Detect the areas of improvement of the Management System, under the commitment of the Management to transform them into strengths of the System to achieve the continuous improvement of the company.
- Develop a quality service, promoting an internal culture oriented to the service of our customers.
- Provide staff with adequate training to carry out their activities with the required quality levels, preventing possible failures as much as possible before they occur.
- Maintain constant contact with our customers, while enhancing relationships with subcontractors and suppliers, carrying out a strict control of the quality of our internal processes and external suppliers.
- Comply with the requirements established with the client, the ISO 9001 regulatory requirements, legal and intrinsic to our service, as well as other requirements established by our company.
- Adapt the company's services to new markets, the globalization of the economy and new technologies constantly.
- The Quality Objectives emanate from the Quality Policy, which is periodically reviewed by the Management.
- This policy is based on strategic direction and includes a commitment to continuous improvement.

Environmental policy is based on the following fundamental principles:

- Comply with the applicable Environmental Legislation and Regulations and with other requirements that AERODYNAMICS MÁLAGA S.L subscribes.
- Continuously Improve and Prevent Pollution, that is, minimize and avoid, as far as possible, the environmental impacts of our activity.
- Inform and collaborate with the Public Authorities in crisis and emergency situations, and express our permanent willingness to cooperate with them.
- Involve, train and hold accountable the people who integrate the Organization so that they respect, share and apply the Environmental Management System, whether they are workers, suppliers or subcontractors.
- Take measures to improve the environmental sustainability of the production system.

These principles constitute the framework in which the objectives and goals of AERODYNAMICS MÁLAGA S.L are established for its Environmental Management System. We ask for the support of all those involved in order to contribute to leaving a better legacy for future generations.

The Management of AERODYNAMICS MÁLAGA S.L, represented in the Information Security Management Committee, within the strategy, considers Information Security and personal data security as a vital aspect to guarantee the achievement of business objectives.

The organization undertakes to guarantee the maximum security of the services provided, that is, the confidentiality, integrity and availability of the data, systems and / or communications managed by AERODYNAMICS MÁLAGA S.L.

The Management of AERODYNAMICS MÁLAGA S.L is committed to leading and promoting security at all levels in accordance with the Security Policy and the objectives defined and approved therein, both in general and in particular, and create a Management System for Information Security (SGSI) that is articulated in a way that it complies with the legal or regulatory requirements, manage the protection and distribution of the organization's assets, and it is distributed and published in the corporate network for a better knowledge by all employees.

This policy has been developed with the consensus of the personnel included in the scope of the SGSI and has been accepted by the Information Security Management Committee of AERODYNAMICS MÁLAGA S.L.

The Information Security Management Committee of AERODYNAMICS MÁLAGA S.L is committed to ensuring the understanding and involvement of all staff in achieving the objectives of the SGSI.

This policy will be reviewed annually and will be modified when the Committee considers it relevant for the continuous improvement of it.
